

Streamline Grants Management with Automated Solution for Better Mission Outcomes

Grant Management Systems automate the entire grant lifecycle, from funding opportunities to receiving and evaluating applications, selecting awardees, monitoring grants, and reporting metrics. REI Systems' grant systems streamline grant operations, manage risks, enhance reporting, and improve the impact and outcomes of grant programs. We provide the technology to manage and automate grant processes and compliance reporting, freeing up teams to focus on what matters most: the program mission.

REI GRANT SOLUTIONS

For over 30 years, REI has helped federal, state, local, and nonprofits implement advanced grants management systems. We have a deep understanding of the challenges, drivers, and outcomes associated with grant management. Our custom, turnkey, and modular cloud and web-enabled solutions are designed to meet your specific needs.

Custom Grant Management Solutions

REI Systems offers tailored grants management software solutions for federal agencies that cover the entire grants process, from initial planning to final reporting & closeout.

Turnkey Grants Solution

GovGrants® is a cloud-based grants management software solution powered by FedRAMP-certified Salesforce to support the entire grants process. GovGrants is a low-code option for agencies that don't need a custom grant solution.

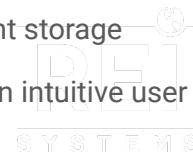

Modular Grants Solution

GovReview manages the application peer-review process, generates peer review scores, streamlines interactions between reviewers, and integrates with grant management solutions.

REI GRANT MANAGEMENT SOLUTION BENEFITS

- **Streamlines the grants process** - Increases process efficiencies, and automates manual tasks
- **Offers critical programmatic analytics** - Collects, stores, and analyzes grant data for better decision making
- **Program compliancy** - Leverages electronic traceable approvals and secure document storage
- **Improves user and customer experience** - Incorporates human-centered design for an intuitive user experience and increased productivity

OUR GRANT MANAGEMENT SYSTEMS IMPACT

HHS Health Resources and Services Administration (HRSA)

REI supports the development and modernization of HRSA's healthcare grant funding system, which helps nearly 30 million disadvantaged Americans. Our work includes business process streamlining, customer experience design, data analytics, and change management. REI also provides performance reporting capabilities and data analysis and dashboard solutions that enhance overall decision-making.

The Utah State Board of Education (USBE)

USBE provides programmatic and fiscal grant support across the state of Utah. It manages \$4.5 billion in grants on over 40 error-prone spreadsheets. The system was fraught with overpayments, non-compliance, and a lack of transparency. GovGrants automated the entire lifecycle, optimizing USBE's labor and payment operations. That led to enhanced visibility and accountability, less waste and risk, and increased productivity by 35%.

National Science Foundation (NSF)

REI supports the peer-review process for six NSF grant programs. Our solution replaced a manual, time-intensive process to speed up decision-making. It also made panel reviews faster and enabled them to be conducted on multiple topics. Reviewers now have a one-stop portal to review proposals independently as well as in a panel setting.
